Material
Material
Matériel

Compacto fabricado a base de resinas, cargas minerales formuladas y acabado superficial con nuestro Gel-Coat especial de altas prestaciones (isofáltico sanitario, sin poro, tratamiento U.V., antibacterias, alta resistencia) utilizado en la industria naval y aeronáutica. Con este último acabado, evitamos problemas de hidrólisis a medio y largo plazo superando a la vez todas las exigencias de la norma UNE-EN 14527 y obteniendo de esta forma el marcado CE para nuestros platos de ducha.

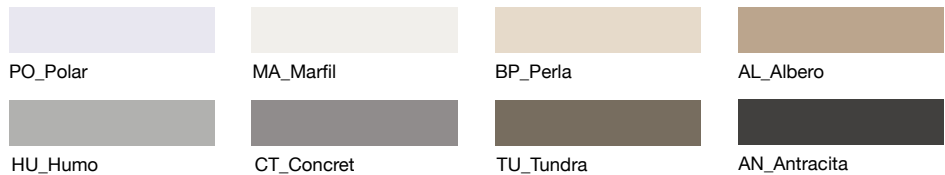

Compact made with resins, mineral fillers formulated and our special high-performance Gel-Coat surface finish (sanitary isophthalic, non-porous, UV treatment, antibacterial, high resistance) used in the shipbuilding and aeronautics industries. This finish prevents problems of hydrolysis in the medium and long term, while exceeding all of the requirements of the UNE-EN 14527 standard, thereby allowing us to obtain the CE marking for our shower trays.

Matière fabriquée à base de résines et charges minérales formulées, développée par Poalgi pour la fabrication de ses receveurs de douche. Avec Wraitom, Poalgi propose un équilibre parfait entre résine, charges minérales et finition de surface avec notre <<gel coat>> de haute prestation (isophthalique sanitaire, non poreux, traitement U.V., antibactériens, haute résistance). Avec cette matière, laquelle répond à la norme UNE-EN 14527 et obtenant de fait le label CE, les problèmes d'hydrolyse à moyen et long terme sont proscrits.

Colorstandard

Pequeñas variaciones en los tonos de las piezas son una particularidad de los productos fabricados con cargas y pigmentos naturales y deben considerarse válidas.

Slight variances in tone are a characteristic feature of products made with natural fillers and pigments and should be considered valid.

De légères variations de ton sont une caractéristique des produits fabriqués avec des charges et des pigments naturels et doivent être considérées comme valides.

El sistema colorplus de poalgi consigue adaptar el color de tu fregadero a partir del color de cualquier superficie (encimeras sintéticas, encimeras de madera, cerámica, porcelánicos, compactos) y/o gama de color tipo carta universal RAL o NCS.

The colorplus system, based on the RAL or NCS coding system offers endless options four product customization.

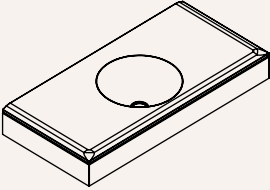

Le système colorplus, basé sur le système de codage RAL ou NC offre des options infinies de personnalisation de quatre produits.
